- Implement the movies app (listing movies , enable user to click and see their data)
- Update the movie listing page and individual movie pages with data from database
- Implement a search functionality
- Helped make the showcase website

Description :

- How your team follow Scrum and the design decisions behind your solutions (principles , patterns , etc.) . Use diagram as tools to communicate your rationale
- Discussion of outcomes :
 - We discuss and finalize what our movie store should look like
 - Pages
 - Models
 - Functionalities
 - etc.
- Plan out macro stages of the project :
- Put small tasks on scrum board and assign deadlines every week
- When we stuck at some point , we say it out during meeting , then together we find a way to resolve it . Usually , the solution comes from the text book and Youtube .

- We also communicate frequently to check others out and remind them about their to-do tasks.
