

2) First Component :

- Prob : request changes cause significant delays

→ Present & Explain the benefits of swapping to Agile methodology

- Agile methodology : a project management approach that involves breaking the project into phases and emphasizes & collaboration and development

Benefits

- ① We know our work tier into a bigger story
- ② We get better at collaboration
- ③ Faster and more frequent delivery of working software
 - We can focus on main functionalities and get immediate feedbacks
 - Waterfall lacks flexibility, where engineers has to follow a strict predetermined model, leading to late delivery and lack of feedback

- User story 6: As a user, I want to search movies per title so I can make my selection
